*The longest ferry-route takes 30 Minutes...*

# Isefjord - What is a "Fjord"

## FROM WIKIPEDIA

"A fjord is formed when a glacier cuts a U-shaped valley by ice segregation and abrasion of the surrounding bedrock.

Glacial melting is accompanied by the rebounding of Earth's crust as the ice load and eroded sediment is removed (also called isostasy or glacial rebound)".

## THE ISEFJORD IS AN

**Threshold fjord** = The inner part (South) of the fjord is deeper than the outer (North).

**THE LENGTH OF THE ISEFJORD IS APPROX 34.2 Km**

## THERE ARE 10 PORTS

And never more than approx. 7 nautical miles to a port - and lots of anchorplaces..

# Isefjord - See it for yourself
